NOTE:

- This form should not be considered a comprehensive Job Hazard Analysis (JHA). Its intent is to identify respiratory disease transmission exposures and controls in the workplace. Information on how to perform a detailed Job Hazard Analysis (JHA) can be found at <https://www.osha.gov/Publications/osha3071.pdf>.
- Control measures to prevent the transmission of respiratory disease in the workplace have the potential to expose workers to new hazards, such as: ergonomic, moving parts, overhead hazards, fatigue, lack of access to emergency stop controls and chemical exposure. Extreme consideration should be given to the completion of a thorough JHA prior to workers returning to the workplace.
